Allowable Subject Matter

1. The present invention is directed to a device that counts the number of packets to be sent and then calculates the charges or costs associated with the packets before the packets have been sent and finally displays the charges or costs associated with sending the packets before the packets have been transmitted.

The closest prior art is Ketola (U.S. Patent No.: 6,112,099). Ketola teaches terminal which has the means for measuring and displaying the costs associated with the transfer of data packages or packets over a period of time which means that the costs or charges are displayed after the packets have been sent.

The closest prior art Ketola does not disclose anticipate or render obvious the following claim limitations:

“display means for displaying the communication charge calculated on the basis of a counting result of said counting means before the packet data is transmitted” as claimed in claim 1.

“display means, installed in said mobile station, for displaying the communication charge output from said calculation means before packet transmission” as claimed in claim 11.

In addition:

Claims 2-10 are allowed because they depend upon claim 1.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert W. Wilson whose telephone number is 571/272-3075.

The examiner can normally be reached on M-F (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chau T. Nguyen can be reached on 571/272-3126. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
